Statistics regarding

California Irrigation Districts

For year 1916-1917

The contents of this circular, while not guaranteed, are based on information either furnished by the Secretary of each District or received from other sources which I regard as reliable.

Edward N Pearson Jr

EDWARD N. PEARSON, JR.

FROM CALIFORNIA FARMS

[REDACTED]

The following estimated farm production during 1916 depended, in a substantial measure, upon the *practice of irrigation.*

Hay	\$55,000,000	*Potatoes and Onions . .	\$17,500,000
*Dairy Products . . .	45,630,000	*Fresh Vegetables . . .	12,000,000
Cereals	41,040,000	*Cotton	5,600,000
*Citrus Fruits	40,000,000	*Nuts	5,000,000
Meat Products	37,000,000	*Nursery Products . . .	5,000,000
*Dried Fruits, Raisins, Prunes	34,000,000	*Rice	4,750,000
*Fresh Fruits	28,000,000	*Melons	4,000,000
*Beet Sugar	25,000,000	Olives and Olive Oil . .	3,500,000
*Table and Wine Grapes	21,300,000	Wool	3,000,000
*Beans	20,600,000	Hops	3,000,000
*Canned Fruits and Vegetables	20,000,000	Seeds	3,000,000
Poultry Products . . .	20,000,000	Vinegar and Cider . . .	2,500,000
		Honey and Wax	1,200,000

Total \$457,620,000

*Irrigation practiced

[REDACTED]

My recommendation of certain California Irrigation District bonds is founded on these unchangeable facts—namely, that agricultural land is indestructible, that there is no substitute for water in making soil productive and that the prosperity of the business of farming, which is California's dominant and most enduring industry, depends vitally, *and will continue to*, upon the *practice of irrigation.*

These facts constitute a confidence-inspiring starting-point from which to analyze an investment structure.

IMPORTANT

The investment desirability of specific California Irrigation District bonds cannot be conclusively indicated by statistics of the nature herewith given. A thorough knowledge of all phases of *each District is essential*.

EXPLANATION

Note A

The values shown on the assessment roll are for the *land alone*. *Improvements* (buildings, trees, vines, etc.) and *personal property*, which are assessed by counties, cities and school districts, are *not assessed* by California Irrigation Districts. Therefore, the assessed valuation does not indicate the real values which are "pledged" to "secure" the payment of an Irrigation District bond issue. Furthermore, the assessed valuation does not include the value of the *irrigation system*, which is generally equal to the total bonded debt.

Note B

The bonded debt is retired in *serial payments* commencing not later than the twenty-first year and ending not later than the fortieth year after bonds are issued.

Note C

Issuance of additional \$2,500,000 bonds contemplated for improvements.

Note D

Issuance of additional bonds expected to be required to provide mountain storage of the flood waters.

Note E

Issuance of about \$500,000 additional bonds contemplated to complete system; *no mountain storage required*.

Note F

Percentage of issued bonds to assessed valuation.

Note G

Outstanding bonded debt per acre.

Note H

Towns of Lindsay and Strathmore are not included in the District.

August 20th, 1917.

Mr. J. C. Rowell, Librarian,
University of California,
BERKELEY, CAL.

Dear Sir:-

In response to your letter of August 16th,
I take pleasure in enclosing four copies of my circu-
lar containing statistical information regarding Cali-
fornia Irrigation districts.

Very truly yours,

E. Pearson

Bond Department.
